

Iowa Interactions FY 2001-2002

The Institute for Physical Research and Technology assisted over 240 organizations in 114 cities and towns, covering 71 Iowa counties. This assistance ranges from initial contact and referral to full research projects.

IPRT Funding Sources

More than 835 faculty, professional, clerical and student employees serve the Institute for Physical Research and Technology. Well over one-third of IPRT's staff is composed of Iowa State University graduate and undergraduate students who contribute to IPRT's excellence while seeking degrees.

In fiscal year 2001-2002, IPRT programs and projects received funding totaling \$50 million. Federal agency grants composed 79 percent of this funding, with the U.S. Department of Energy's support for ISU's management and operation of Ames Laboratory accounting for more than half of that amount. State of Iowa special appropriations for economic development, industrial contracts, ISU allocations, memberships and gifts provided the remaining 21 percent.
